

**WAYCO**

## **WAYCO:** SYNERGY AND INNOVATION IN SUPPLY CHAIN MANAGEMENT

Born from the strategic merger between **COVERACT SRL** and **I-WAY SRL**, **WAYCO SRL** emerges as a new player specialized in logistics, quality, and supply chain management — the result of a solid and synergistic collaboration. An innovative entrepreneurial **project founded on complementary expertise** and a shared vision, with a clear objective: **to deliver concrete, effective, and tailored solutions across the entire supply chain.**

# Supply Chain

The Supply Chain **is the company's nervous system**: it connects suppliers, production, logistics, and customers in a continuous flow of materials, information, and value.

A well-designed Supply Chain:

- **reduces costs and waste;**
- **accelerates time-to-market;**
- **increases competitiveness;**
- **ensures quality and operational continuity.**

In an increasingly interconnected and unstable world, the **Supply Chain** is not just a process — **it is a strategic and competitive advantage.**

## Our Mission

Leading businesses toward an effective, sustainable, and innovative Supply Chain through tailored solutions and a hands-on operational approach.

## Core Competencies

- Procurement
- Controlling
- Integrated Logistics
- Manufacturing Planning

**WAYCO** specializes in the design, development, and integrated management of the Supply Chain.

End-to-end projects for a complete and high-performing Supply Chain.

**We do not simply provide consultancy: we become strategic partners** for companies operating in complex and constantly evolving environments.

## Our Values

- **Pragmatism:** clear objectives, measurable results.
- **Innovation:** we continuously evolve processes and tools.
- **Excellence:** we work toward continuous improvement.

## Research & Innovation

We invest in the development of digital solutions and collaborate with academic institutions to explore new methodologies and attract talent.

# 5PL Logistics and Warehouse Management

The term 5PL (*Fifth-Party Logistics*) refers to an advanced level of logistics management, where an external provider coordinates and optimizes a company's entire Supply Chain, often integrating multiple suppliers.

**WAYCO** simplifies the management of these processes by offering solutions that integrate strategy, technology, and coordination to organize even complex logistics networks, ensuring control, efficiency, and visibility across the entire value chain.

## Integrated Warehouse Management

Activities can be carried out either at our own facilities and/or directly at the customer's premises, ensuring flexibility and operational continuity.

## Distribution Network

Coordination of transport and delivery activities, with customized solutions tailored to different types of goods and destinations.

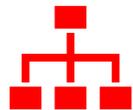

## End-to-end Supply Chain control.

Comprehensive oversight of processes from source to final customer, supported by digital tools enabling real-time visibility.

## Operational flexibility

Ability to adapt to various business models and industry sectors.

**Reliable technology systems:** use of WMS (Warehouse Management System) and TMS (Transportation Management System) software for the control and optimization of warehouse operations.

**Real-time tracking and oversight:** Ongoing traceability of inventory and movements to ensure accuracy, prevent stockouts, and improve planning.

**Improved accuracy and cost-effectiveness:** Optimization of operational flows aimed at minimizing waste, reducing process times, and lowering overall management costs.

**Tailored approach:** In-depth analysis of business requirements and design of customized solutions to ensure maximum flexibility and long-term scalability.

**Tangible results:** Increased productivity, enhanced customer service, and support for sustainable business growth.

# Quality Management System

**WAYCO** provides comprehensive and tailored support for the design and evolution of **quality management systems**, ensuring full compliance with current regulations and a continuous improvement-oriented approach.

The team is composed of qualified specialists with formal training and official accreditations, capable of conducting third-party audits according to the *VDA 6.3* standard and second-party audits for *IATF 16949*, guaranteeing expertise, methodological rigor, and strategic vision.

## Supported Certifications

- ISO 9001 – Process Quality and Customer Satisfaction
- IATF 16949 – Quality in the Automotive Supply Chain
- ISO 14001 – Environmental Management and Sustainability

## What We Do

- Design and Implementation of the Quality Management System
- Internal Audits and Gap Analysis
- Document Management and Regulatory Updates
- Ongoing Operational Support
- Continuous Improvement Projects

## Focus Areas

- **PPAP & APQP** – Advanced Product Quality Planning for Manufacturing and Development
- **Audit according to VDA 6.3:2023** – Compliance with regulatory updates

## Training and Consulting

- Training programs on quality, environmental management, and workplace safety.
- Awareness-building and internal skill development.

# Procurement & Assessment Suppliers Base

**WAYCO** supports companies as a strategic and operational partner, offering tailor-made solutions for every need.

*« Projects developed based on the customer's specific needs, with the goal of increasing competitiveness and improving supply quality across the entire Supply Chain »*

## **Procurement: from an operational function to a strategic lever**

The Procurement process is a strategic pillar of the company's Supply Chain. It's not just about purchasing, but about designing, managing, and optimizing every phase of the sourcing cycle.

- ✓ Supplier Scouting and Qualification;
- ✓ Cost Analysis and Strategic Negotiation;
- ✓ Make-or-Buy Analysis;
- ✓ Order Management and Performance Monitoring;
- ✓ Outsourcing of Operational Processes.

## **Supply Risk Management: Assess, Improve, and Prevent Risks**

A robust supplier base is the foundation of a resilient Supply Chain.

**WAYCO** supports Customers in the following activities:

- ✓ Supplier Qualification through Audits and Performance Evaluation;
- ✓ Improvement Plans and Guided Growth;
- ✓ Management of Operational Crises and Production Disruptions;
- ✓ Supply Continuity and Reliability.

# Un approccio dinamico alla collaborazione: **modalità operative flessibili**

## ADVISORY

Support on specific projects, with analysis, solutions, and operational roadmaps. Focused on targeted actions, assessments, optimizations, process definition and reengineering, as well as management and improvement of the Quality Management System. Initiatives aimed at cost reduction and enhancement of operational efficiency.

## BACK-OFFICE SUPPORT

Remote operational management through our structure, for ongoing or temporary activities (e.g. data entry, management control, quality system, warehouse accounting, control tower models, etc.). It is a flexible solution, also suitable for replacements or workload peaks.

## TEMPORARY or FRACTIONAL MANAGER IN-HOUSE

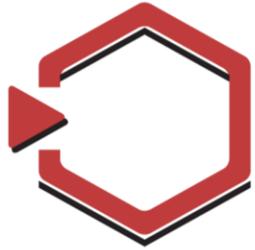

Flexible managerial solution involving the temporary placement of an expert within the company, either full-time or part-time, with the goal of leading strategic projects, managing transition phases, bridging skill gaps, or supporting top management in the decision-making process.

## RESIDENT IN-HOUSE or IN MANUFACTURING CUSTOMER PLANT

Operational personnel located at the customer's premises or directly at the production sites of their partners, clients, or suppliers, working alongside internal teams to ensure operational continuity, quality control, logistics management, or other activities across the extended Supply Chain.

## OUTSOURCING SOLUTIONS

We manage entire business processes on behalf of the client — from logistics to procurement, from quality to the entire Supply Chain — in outsourcing mode, either at our facilities or directly at the client's plants. Operational models may also include the acquisition and management of business units, aimed at ensuring operational continuity, organizational efficiency, and economic optimization.

# Team Organization Overview

# WAYCO for **ESG**: a concrete commitment to the future

Our goal is to build a responsible and sustainable enterprise that values people, protects the environment, and promotes ethical governance, generating a positive impact for society and future generations.

Our guiding values:

✓ **Responsibility and Transparency**

We operate with integrity, traceability, and transparency in every process, fostering trust throughout the entire Supply Chain.

✓ **Diversity, Equity and Inclusion**

We believe in fair, collaborative, and inclusive work environments, where every talent is empowered to thrive.

✓ **Operational Sustainability**

We optimize resources and processes to minimize environmental impact and generate sustainable efficiency.

✓ **Quality as a Culture**

We apply quality principles not only to the services we provide, but also to internal management and stakeholder relations.

## Our first step towards a sustainable future:

**WAYCO** has signed the **Charter for Equal Opportunities and Workplace Equality**, promoted by **Sodalitas Foundation**, to support an inclusive, fair, and diversity-respecting corporate culture. This marks **the first step in our ESG journey**, aimed at integrating the principles of environmental sustainability, social responsibility, and ethical governance into our strategies and daily practices.
